

Corporate Profile

NOVX[®] Systems Inc. (NOVX) is an emerging in-vitro medical device developer and manufacturer that offer a powerful drug screening solution. Through the use of advanced engineering, optics and clinical chemistry, NOVX has engineered a complete screening solution for use in non-laboratory settings by non-technical operators.

Healthcare professionals, judges, employers and other decision-makers rely on NOVX for accurate, dependable results and immediate access to complete case histories, without adding complexity to the scale of their operations.

NOVX possesses a broad base of intellectual property and continually adds to its patent protected knowledge.

NOVX is headquartered in a 27,000 square foot facility in Markham, Ontario.
